This curriculum adopts the Outcome-Based Education (OBE) approach, focusing on clear graduate outcomes and relevant competencies to prepare students for professional roles in educational management.

Our Vision

"Excellent and globally recognized in the development of educational management sciences with an archipelagic cultural character to produce innovative human resources by 2045."

Our Mission

- Organizing high-quality master's education and learning with an archipelagic cultural character to produce graduates who are professional, innovative, and competitive at both national and international levels in the field of educational management.
- Conducting competitive and collaborative research in the development of educational management sciences based on the archipelagic context, in order to produce innovative and tested works at the national and international levels.
- Disseminating and implementing research results in the field of educational management for the development of society, education, and the environment, particularly in archipelagic regions.
- Organizing transparent, accountable, and high-quality program governance to support the creation of a conducive and professional academic environment.
